

## OoZooN image OE1.6 dm800 2010.08.05

**Here comes my latest dm500hd Image from Enigma<sup>2</sup> "experimental" OE 1.6 branch.**

Enigma is of 12.09.2010

the plugins are of 12.09.2010

the drivers are of 23.06.2010

new kernel 2.6.18-r5

secondstage is 79

changes at Enigma<sup>2</sup> can be pursued [HERE](#)

### **My changes at oe:**

own bootlogo's, artwork by clumsy and BVB01

with satellites.xml - enigma<sup>2</sup> by Reinh@rd

changes of dccamd start

dccamd not included in image, can be installed via plugin download

(\*) included

(\*\*) only via plugin-download available

### **Systemplugins:**

automatictimerlistcleanup (\*\*)

autoresolution (\*\*)

cleanupwizard (\*\*)

crashlogautosubmit (\*\*)

### **My changes at enigma:**

MHW epg active

load patch for crossepg

bouquet button patch

.recordings patch

authenticity certificate check (by Dr.Best) <- this image will only work on original dmm hardware!

this image is updateble via plugins -> softwareupdate over internet!

### **OE Build Configuration:**

BB\_VERSION = "1.8-dream"

TARGET\_ARCH = "mipsel"

TARGET\_OS = "linux"

MACHINE = "dm500hd"

DISTRO = "opendreambox"

DISTRO\_VERSION = "1.6.0"

TARGET\_FPU = "soft"
